

NEWS RELEASE

AUGUST 2000

INTASTOP AT GREAT ORMOND STREET HOSPITAL

INTASTOP have recently supplied their Fire Rated Door Edge Guards, Door Sentry Bollards and Aluminium Trapguards to Great Ormond Street Hospital together with Class 'O' Fire Rated Sheet designed and formed into Monkeys, Giraffes and Palm Trees.

INTASTOP'S wide range of door protection products include:

Door Edge Guards

Door Fascia Sheet

Door Frame Guards

Door Sentry Bollards

Door Hinges (Geared)

Door Accessories

Hospitals throughout the country are finding that prevention is better than a cure.

INTASTOP have supplied their Door Edge Guards for refurbishment programmes on both new and existing fire doors in a number of Britain's leading hospitals. This course of treatment has enabled hospitals to save large sums of money as their maintenance bills for repair and replacement of doors have been reduced significantly.

Intastop Ltd

Doors in hospitals suffer more than most from wear and tear resulting from high levels of impact damage from trolleys, wheelchairs and equipment. **INTASTOP'S** Aluminium Door Edge Guards provide impact protection for both single and double fire doors and contain intumescent and brush seal, which ensure that fire tolerances are maintained and are fully tested for both ½ and 1-hour use.

The well-established range of door protection products available from **INTASTOP** cover all possible door protection needs.
