HELPING DOORS AT UCLH TO STAND THE TEST OF TIME

Intastop renowned for providing total solutions for protection of fire doors in healthcare & other public buildings have recently installed throughout the new UCLH Hospital, London Door Edge Guards protecting the leading edge of doors from damage whilst maintaining fire integrity, Class 'O' fire rated impact sheet preventing the face of the door from damage and through working with a door manufacturer installed PVC hygienic clad doorsets. Intastop hygienic smooth sheet fully clad round a doorset proving ideal for Operating Theatre & Clean Room areas.

Many other hospitals throughout the country have found that prevention is better than cure by fitting Intastop products enabling them to save large sums of money on maintenance bills for repairing of doors. The door is a vulnerable part of any building suffering from wear and tear resulting from high traffic levels and impact damage from trolleys, wheelchairs & equipment. Intastop have supplied its products in many hospitals across the UK, most recently at the new UCLH Hospital, London.

Intastop products are suitable for retrofit, refurbishment and new build projects and can be obtained direct from Intastop. For details, contact Intastop on 01302 364666 or visit the company's website at www.intastop.com.
