

**Privacy Vision Panel in open position**

# Vision Panels

Privacy is rightly seen as a basic human right, but can also be a potential danger to both persons and property, especially in detention centres, mental health units, hospitals, immigration centres, care centres and anywhere there is a risk of persons harming themselves.

Intastop Privacy Vision Panels allow discreet observation of the patient while still being able to monitor the situation.

## Easy-to-operate

Intastop Privacy Vision Panels can have dual or single lever operation on one or both sides, key operation or anti-ligature knob operation. The levers are available with an anti-bacterial coating to inhibit growth of harmful bacteria.

## Benefits

- *Increased visibility of up to 40%.*
- *Improved impact resistance (no hole in glass).*
- *Easy inter-changeability between handles.*
- *Fire Tested to BS476: Part 22 for 30, 60 and 90 minutes.*
- *UK Patent pending 10 07 981.2.*

## Colours and finishes

Fire rated and non-fire rated vision panels are available. For a more robust solution a thicker glass or a solid 6mm thick Perspex frontage is available.

Vision panels are available as rectangular 800 x 250mm or 400 x 400mm square. Other sizes available on request.

**NEW - Vision panels now available with an auto drop feature.**

**White Vision Panel**

**Black-out Vision Panel**

**Wave Design Vision Panel**

Rectangular Integral Blind Panel open

### Simply the widest field vision

Offering a significantly larger vision area and a far wider vertical arc vision the patent applied for Intaview Twin Film Integral Blind System is an innovation in privacy and vision control for doors within the commercial and healthcare building environments.

### More vision style and reliability

With its clean lines and modern aesthetics the Intaview Twin Film Integral Blind System suits any modern flexible interior design creating an elegant spacious aspect when the blinds are open and total privacy when closed. Less complex and more robust, the system is durable, reliable and requires no cleaning or maintenance. Simple to operate and strikingly effective it is clearly the future of vision panels.

### Colours and finishes

The Intaview System is available in the pearl colour of etched glass but other colours and or graphic devices can easily be incorporated to suit signage, branding or other applications as required.

### Standard sizes

Standard sizes for doors are 450H x 400W and 825H x 250W but other larger sizes can easily be manufactured.

#### Order details

Order code	Description	Size (mm) HxW
VIV/1	Rectangular Integral Blind Panel	825 x 250
