

Protecting Doors, People and Places for over 25 years

As a proud family business, Intastop values its people, its trusted suppliers and loyal customers. When people work well together success is assured. And that's the driving force behind Intastop for over 25 years. This, together with outstanding levels of customer service, ensured Intastop continues to be a successful, forward thinking brand – and the ideal partner for any project that's Protecting Doors, People and Places.

Experts in Protecting Doors

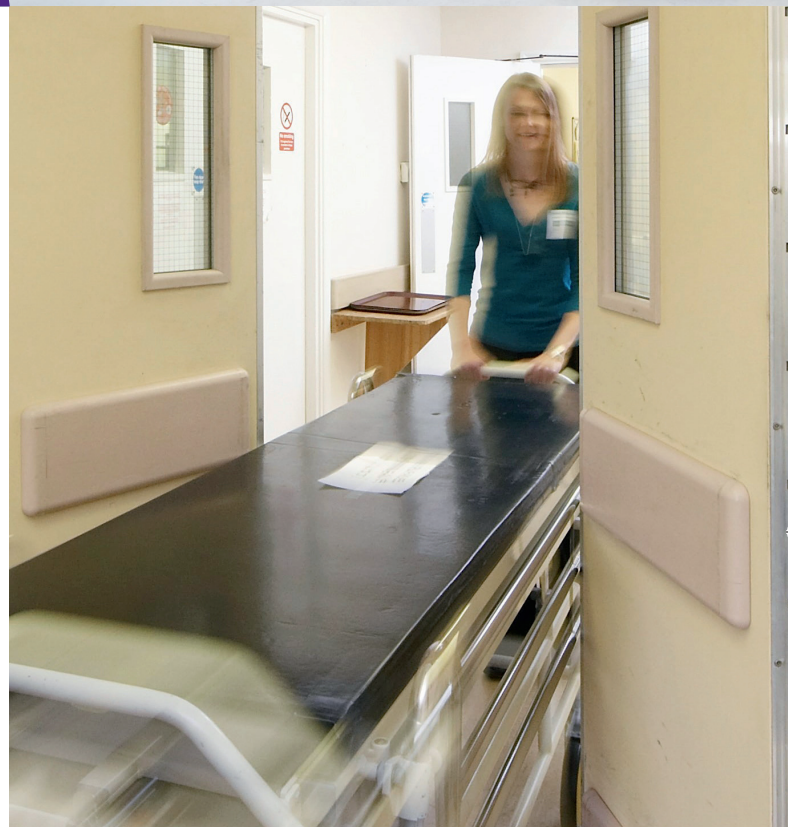

The majority of fire doors in public buildings are damaged, which means they have no fire rating! Intastop were the first to develop a product to solve this problem in the late 1980s - and we continue to be experts at improving and retaining fire integrity, while preventing further damage.

Experts in Protecting People

Reducing patient ligature and improving staff safety is hugely important within mental health environments. With over 20 years' experience in the mental health market, Intastop is the only company to manufacture a complete range of bespoke products and doorset solutions on site from start to finish.

Experts in Protecting Places

Intastop is the sole UK distributor for Inpro IPC®. Our understanding of the demands on interior environments with Inpro IPC®'s global experience in Wall Protection products enables us to offer a variety of designs and colours within the product range to enhance the aesthetic appearance of your building.

“

We are extremely privileged to have a team of dedicated and highly experienced individuals who thrive on providing exceptional levels of service and the best solutions for any protective door or wall requirement.

John Hills Founder of Intastop

”

1992

Intastop opens its doors for the very first time and the revolutionary Aluminium Door Edge Guard is launched onto the market. Professionals in the healthcare sector quickly identify the smart way to protect doors and thereby save money.

The road to success

1992-2018

1993

Achieved Investors In People (IIP) accreditation and gained BS5750 Quality Assurance (now recognised as ISO9001).

1997

Further product successes in the patented Rotary Frame Guard and the Rigid Frame Guard, protecting the pull and push side of doors as well as the vulnerable rear edge.

1998

By introducing our unique Continuous Geared Hinges there was now an effective way to prevent common damage to floors and frames caused by traditional knuckle hinges.

2004

Customer collaboration leads to the launch of our anti-ligature range, comprising at the start: Single Swing Anti-Ligature Hinge and Removable Doorstep.

2014

National Sales force established & dedicated team on internal support to achieve excellent customer service

2012

The highly acclaimed Door Top Alarm is launched to help prevent attempted suicides at tops of doors.

2011

Designed the world's first patented fire rated Double Swing Hinge is launched, allowing busy corridor doors to swing 180 degrees with ease, making it the only viable option to replace pivot door springs.

2010

Rapid business growth and increased customer demands prompt the need to move into larger premises and to invest in state-of-the-art new machinery.

2015

The company invested in Postforming technology. Ensuring complete encasement of doors and frames with Intastop's Impact Protection Sheet

2017

Intastop becomes exclusive UK distributor of Inpro IPC Door & Wall Protection Systems offering an extensive range of Handrails, Wall Guards & Corner Guards.

2018

Installation service available to service major projects. I-Genic Cladding range launched.
