

Project

Our Lady of Lourdes Hospital, Ireland

Product Used

IPC Hand & Combi-Rails

Soft PVC Corner Guard

Heavy Duty Rubber Wall/Corner Protection

Client

SBI Style Blinds & Interiors LTD

Market Sector

Healthcare

Brian Quigley, SBI Style Blinds & Interiors Ltd:

“I had been familiar with Intastop and its products and when we commenced work on this project I knew that the Inpro range of products was more suited to the requirements of the building and the demands it would have on its interior specification. Our client was thrilled with the delivery of the project and the products which gave a superb finish. They have great confidence that they will be hard wearing and protect key areas of the hospital where high levels of patients, visitor traffic are experienced.”

The Project Brief

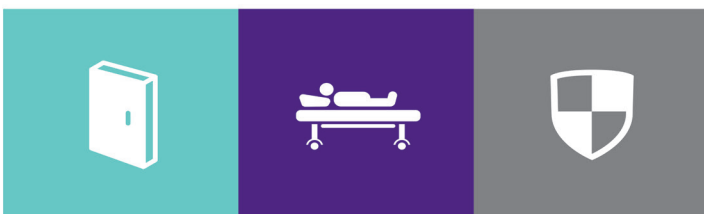

Our Lady of Lourdes Hospital required a refurbishment in areas of high footfall. The hospital benefited from a market leading wall protection after installers chose to upgrade from the architect’s original specification.

The Solution

Wall and door protection specialist Intastop, was re-specified in the project due to its unwavering credentials and compatibility with other aspects of the refurbishment scheme at Our Lady of Lourdes Hospital in Drougheda, Co Louth, Ireland. The product range specified included products from our partner Inpro, and IPC Hand & Combi-Rails, Soft PVC Corner Guard and Heavy Duty Rubber Wall/Corner Protection were used throughout the project. This hospital refurbishment project has benefited from a market leading wall protection after installers chose to upgrade from the architect’s original specification.

The Benefits

- Protects against impact from wheeled traffic.
- Reduces maintenance costs by deflecting traffic from vulnerable areas.
- Suitable for medium to heavy duty applications.
